DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 1. Claims 1-5,7,9-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mikurak(US 6,671,818) in view of Shaffer(US 6,748,426).

Claims 1-2,4,7,11,14,15: Mikurak disclose receiving a request for a SSL session to transfer information with a client in (fig.120 and col.271,lines 28-31). Mikurak disclose determining that if the request from the client has a current valid session id and determining if a location of the information in the request from the client is not on a server which is used for the current valid session id in (col.271.lines 46-51;col.272,lines 21-50;col.274,lines 38-55). Mikurak does not specifically disclose if the location of the information is not on the server which is used for the current valid session id,then transferring the current valid session id from the server that is used for the current valid session id to a server that contains the requested information. Shaffer disclose this limitation in (col.9,lines 47-67;col.10,lines 1-10). It would have been obvious to person of ordinary skill in the art at the time invention was made if the location of the information is not on the server which is used for the current valid session id,then transferring the current valid session id from the server that is used for the current valid session id to a server that contains the requested information as taught in Shaffer with system of Mikurak in order to provide broad range of data access capabilities for the users with continuous data session without interruption thus offering user friendly environment for the users.

Application/Control Number: 09/834,193

Art Unit: 2135

Claim 3: Mikurak disclose establishing a SSL session with the client to the server that contains the requested information in (col.274,lines 38-45).

Claim 5: Mikurak disclose step of receiving a request for a SSL session includes receiving a SLL request over a wireless network in (col.35,lines 60-67).

Claims 9,10: Mikurak disclose sending a request for a SSL session by the client is caused by the requirement for secure information exchange in (col.274,lines 37-55).

Claims 12-13: Mikurak disclose at least one load dispatching processor includes an interface to a centralized repository for storing the session keys for each of the two or more servers in (fig.120 and col.274,lines 46-55).

Claims 16,17: Mikurak disclose programming instruction of establishing a SSL session with the client to the server that contains the requested information in(col.271,lines 20-43).

Claim 18: Mikurak disclose programming instruction of receiving a request for a SSL session includes receiving a SLL request over a wireless network in (col.35,lines 60-67).

Allowable Subject Matter

2. Claims 6,8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hosuk Song whose telephone number is 571-272-3857. The examiner can normally be reached on Tue-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kim Vu can be reached on 571-272-3859. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
